1. INTRODUCTION

The Consumer Council for Water (CCWater) Operational Business Plan outlines how we will deliver our Forward Work Programme for 2009-10.

From what consumers have told us about their priorities and concerns, the Consumer Council for Water believes that we and the industry need to focus on price and value for money and sorting problems quickly.

Our priority areas of work for 2009-10 are:

- *2009 Price Review - pressing for consumers to be at the heart of the review, so they view the outcome as acceptable and what they can afford.*
- *Value for Money - a fair charge for the service, and help for those who cannot afford to pay.*
- *Right First Time - problems sorted out quickly without hassle.*
- *Water on Tap - safe, good quality tap water, improved supply reliability and encouraging the wise use of water.*
- *Competition - promote much faster progress towards a competitive regime that works for all business customers.*
- *Sewer Flooding - sewer flooding prevention and adequate response from Water and sewerage companies.*

Our sponsors, Department for Environment, Food and Rural Affairs (DEFRA) and the Welsh Assembly Government, have commented on the content of our Forward Work Programme.

A separate Forward Work Programme and Operational Business Plan will be issued for Wales.

For each priority area we highlight:

- the strategic objective;
- what we will do, with a brief description of actions;
- what our actions will deliver;
- our targets so that we can measure where CCWater has added value for consumers.

These are explained in **Section 4**.

Other activities and monitoring

While we will focus on our priority work areas, we will step in where there are areas of concern to water consumers, and intervene and speak up on their behalf.

This is explained in **Section 5**.

Some activities underpin all that we do. These activities are:

- **Sustainable development**
Continue to develop CCWater's approach to sustainable development to apply it to all projects that we undertake.
- **Vulnerable groups**
Continue to develop CCWater's approach to supporting the vulnerable in society and apply it to all projects that we undertake.

2. OUR DELIVERY APPROACH

In delivering our business plan we will:

- Be aware of our legal duties. These are shown in **Appendix A**.
- Maintain a strong focus on advocacy.
- Engage with all consumers including those who are disabled or chronically sick, of pensionable age, on low incomes, living in rural areas and those unable to switch suppliers in the limited competitive market, so that we can develop a real understanding of their needs and work in line with their specific interests. We will act on behalf of businesses as well as households.
- Fulfil our duty to contribute to achieving sustainable development by showing consumers how we balance the economic, environmental and social aspects in all that we do. We will demonstrate this through our performance measures.

3. MANAGING PRIORITY AREAS

Strategic objectives and key targets

For each priority area we have identified our strategic objectives and indicators of success. The indicators of success are designed to demonstrate how CCWater will make an impact and make a real difference for customers of water and sewerage companies.

What we will do

For each priority project we have identified a series of outputs together with what we will aim to deliver.

Overall Measurement of CCWater's achievements and effectiveness

We have developed a monitoring and measurement management framework. This aligns the corporate strategy in the Forward Work Programme to business and individual objectives for CCWater. To help us to measure our performance, in the delivery of our targets we will commission:

- Consumer Tracking research to assess the extent to which the effect of our campaigns have been recognised by consumers. We will also use this to track consumers' concerns about water and sewerage services.

- A periodic stakeholder survey, to gauge how influential we have been as consumer advocates.

Consumer research

We have developed a research plan to underpin our Forward Work Programme and to ensure that policy positions are based on robust evidence and reflect an up to date picture of consumers' views. This plan ensures we continue to check we are accurately representing consumers views and tackling the issues they highlight as their prime concerns.

Partnership working

CCWater will work in partnership with Government, regulators, each water company, consumer bodies and other organisations to deliver our outputs.

Specific risks and counter measures

CCWater is managed using a risk based approach. For each risk we have identified:

- Key controls - what controls/systems we have in place to manage the risk.
- Assurances on controls - evidence that controls/systems are in place are effective in managing risks.

The key risks to CCWater are listed in **Appendix B**.

The framework and risks are monitored and reported to the Board/Audit and Risk Committee on a quarterly basis.

4. OUR PRIORITY PROJECTS IN 2009-10

2009 Price Review - pressing for consumers to be at the heart of the review, so they view the outcome as acceptable and what they can afford

Objective

Engage with key stakeholders to put domestic and business consumers' views at the heart of the 2009 Price Review, and to ensure consumers' acceptance that the Price Review represents:

- a good outcome in terms of improving the safety and reliability of the services they pay for;
- enhancement of the local and wider environment; and
- a fair price for what they receive.

What we will do

Work with DEFRA, the Welsh Assembly Government, regulators, companies and other stakeholders to address the following issues:

Consumers' views

- Ensure that consumers views about priorities are at the core of any decisions for future investment, particularly in relation to:
 - the reliability of water company systems;
 - the safety and aesthetics of drinking water;
 - the development of additional sources of water such as new or extended reservoirs, de-salination plants, or local water grids;
 - using water wisely, the frequency of hosepipe bans and the scale and pace of water metering programmes;
 - improvements to the sewerage network including the reduction in the number of properties at risk of, or subject to, sewer flooding; and
 - environmental protection and improvement schemes.
- Represent consumers' interests in various Price Review working groups.
- Ensure consumers' views are fully reflected in companies' draft and final business plans and Ofwat's decisions by participating locally with the Environment Agency, Drinking Water Inspectorate, Natural England, the Countryside Council for Wales and each water company.

Investment

- Ensure that companies' investment proposals are subject to robust cost benefit analysis, and challenge those proposals that have a high cost but a low benefit.
- Consider whether requirements under the Water Framework Directive (European Union (EU) Directive to improve the water environment) are appropriate for this or for later pricing periods.
- Consider the implications of the cost of capital (the minimum return that providers of capital require to prompt them to invest in or lend to the appointed water companies given their risk) from consumers' perspective.

Sustainability

- Ensure that sustainability in its broadest sense - environmental, social, economic, good governance, and using sound science responsibly - is included in company proposals, and in the wider decision making process.
- Encourage the promotion of innovative solutions to problems, in particular those that harness the cleansing power of nature rather than the adoption of energy and chemical intensive processes.
- Encourage greater use of renewable energy sources by companies so that they can reduce their emission of greenhouse gases and help the industry meet Government's carbon reduction commitments.
- Identify how the Government's Carbon Reduction Commitment scheme could impact on water companies, particularly water only companies where the scope for renewable energy production is limited.

Paying for investment

- Use customers' views on the extent of their acceptability of and willingness to pay for companies' proposed investment programme (as detailed in both company and national stakeholder research), and ensure that these are taken into account in the decision making process by water companies, regulators and government.
- Ensure there is clarity from Governments and regulators on their approach to future investment if customers are not willing to pay.
- Press for provisions to be made for those customers who are least able to pay ever increasing water and sewerage charges.
- Speak up for the vulnerable in society and challenge companies, regulators and Governments to consider the needs of the disabled and sick, those of pensionable age, those in rural areas, and those on low incomes.

What this will deliver:

Consumers' requirements drive the 2009 Price Review with the outcome reflecting the majority view on priorities for investment and willingness to pay. Central Government to provide help to those unable to pay.

Measure/Indicator of success	2009-10
Companies have used consumers' views to shape their final business plans and the business plans are supported by Government and regulators.	Monitor companies & consumers' acceptability.

Value for Money - a fair charge for the service, and help for those who cannot afford to pay

Objective

- Improve customers' understanding of what they get for their money, and significantly improve the help available for those who are vulnerable or cannot afford to pay.
- Encourage the development of charging systems that meet customers' needs.

What we will do:

- Use the findings of consumer research to inform our policies.
- Work with all relevant bodies and organisations to influence future decisions on charges based on our policy.
- Call for Central Government assistance to be provided for customers who cannot pay their water bill. Consider how else the problem of not being able to afford your water bill could be addressed.
- Continue to press our view that water charges must be fair, transparent and cost reflective.
- Encourage companies and Ofwat to consider innovative ways to help those who cannot afford their bills, for example using new tariffs, and by consideration of the recommendations from, for example, the South West study of affordability.
- Press our view that all business consumers, regardless of how much water they use, should have the right to choose their supplier.
- Make sure that Water Framework Directive plans are affordable, represent value for money and are appropriately phased.
- Influence European consumer and environmental policy proposals in particular where they are not well considered or in line with consumers' views.
- Provide views on improvements to water companies' draft charges schemes to Ofwat.
- Press Central Government to ensure that adequate and timely protection is in place for vulnerable customers who may be disadvantaged by metering.
- Assess the WaterSure special tariff scheme to identify and share best practice in the promotion and targeting of the scheme, and in dealing with applications.
- Review companies' proposals to address the growing problem of outstanding water bills.

What this will deliver:

Sustainable, more customer focused, fairer charging schemes. Central Government recognition of the need for financial support to vulnerable and low income households. An increased take-up of the WaterSure tariff. Consumers' views are recognised and influence decisions on implementing the Water Framework Directive.

Measure/Indicator of Success	2009-10
Consumer views and research evidence are built in to Defra's Water Strategy Review of fair charging and metering, and the Welsh Assembly Government Strategic Policy Position Statement on Water.	Governments accept that mechanisms must be in place to protect those who are vulnerable and least able to pay.
Measure/Indicator of Success	2009-10
Volume of special assistance customers on the companies' registers, and a better balance between customers seeking Special Assistance in the water industry and those in gas and electricity.	A 10% improvement in the figures returned to Ofwat in the June Return compared with last year.
Volume of consumers' satisfied with the value for money from the water and sewerage services in their area.	Results from Tracking Survey.
Business consumers' views are heard within the Independent Government review of competition.	Progressive measures are agreed by government and implemented.

Right First Time - problems sorted out quickly without hassle

Objectives

- Companies deliver a service that meets consumers' expectations, so avoiding complaints.
- Companies' customer services compare well against other sectors.
- Companies recognise the differing needs of consumers when delivering services.

What we will do:

- Deal with consumers' complaints about their water company when they have not delivered a service consumers' expect.
- Measure consumer satisfaction when they have contact with their water company.
- Work with Ofwat and the water industry to incentivise companies to improve the consumers' experience of their water company.
- Share with Ofwat information we collect on consumers' service levels for each company.
- Assess companies' complaint handling and debt management practices through CCWater's assessments of these processes.
- Learn lessons from major events by encouraging companies to share experiences and improve their responsiveness in the future.
- Use available information to measure and improve industry performance.
- Act as a sounding board for water companies to test and refine their policies and practices for consumers to deliver real benefits to consumers.

What this will deliver:

- Water company service compares favourably against other industries.
- Consumers acknowledge their satisfaction with the service they are receiving from the water industry.

Right First Time	2009-10												
One percentage point year on year increase on consumer satisfaction with CCWater's complaint outcome, speed and quality of service. Courtesy is a new measure.	<table> <tr> <td>Outcome</td> <td>61%</td> <td>(58%)</td> </tr> <tr> <td>Speed</td> <td>76%</td> <td>(73%)</td> </tr> <tr> <td>Quality</td> <td>64%</td> <td>(61%)</td> </tr> <tr> <td>Courtesy</td> <td>82%</td> <td></td> </tr> </table> (from base 2006/07)	Outcome	61%	(58%)	Speed	76%	(73%)	Quality	64%	(61%)	Courtesy	82%	
Outcome	61%	(58%)											
Speed	76%	(73%)											
Quality	64%	(61%)											
Courtesy	82%												
One percentage point year on year increase on number of complaints to CCWater resolved within our 20 day and 40 day targets	<table> <tr> <td>5 day response</td> <td>99%</td> <td>(98%)</td> </tr> <tr> <td>20 day close</td> <td>75%</td> <td>(73%)</td> </tr> <tr> <td>40 day close</td> <td>89%</td> <td>(87%)</td> </tr> </table> (from base 2007/08)	5 day response	99%	(98%)	20 day close	75%	(73%)	40 day close	89%	(87%)			
5 day response	99%	(98%)											
20 day close	75%	(73%)											
40 day close	89%	(87%)											
Consumers satisfaction with companies handling of complaints and enquiries	Measurable Improvement on the CCWater's customer satisfaction survey (CSS) and Annual Tracking survey												

Water on Tap - safe, good quality tap water; improved supply reliability, and encouraging the wise use of water

Objective

Consumers to receive a safe, good quality, secure and reliable supply of water, and value water as a resource by using it wisely.

What we will do:

- Continue our work with the Drinking Water Inspectorate (DWI) and water companies to ensure that consumers receive appropriate information and advice on drinking water quality.
- Continue our work within the Water for Health Alliance Stakeholder coalition, with the Drinking Water Inspectorate and others to help inform consumers about the high quality of tap water. This will include our work on promoting the serving of tap water at restaurants and cafes.
- Encourage water companies and other key stakeholders to continue to improve communications with consumers about using water wisely and the potential benefits of doing so.

What this will deliver:

Consumers increasingly choose to drink tap water. Consumers will gain a better understanding of the value of water as a resource and how to use water wisely, and what needs to be done to make their long-term supply of water secure. There will be a gradual change in consumers' behaviour in relation to water use.

Measure/Indicator of success	2009-10
Percentage of consumers who agree that "everyone needs to do what they can to reduce the waste of water".	Year on year increase in the tracking survey results.
Percentage of consumers who are satisfied with the taste and the smell, colour and appearance, safety and reliability of supply of their tap water.	Year on year increase in the tracking survey results.
Engage in two consumer communication initiatives for tap water within the Water for Health Stakeholder Alliance.	Monitor via Business Plan.

Competition - promote much faster progress towards a competitive regime that works for customers, particularly business customers

Objective

To reinforce our stance that any development of competition needs to focus first on businesses, so that all business consumers, regardless of how much water they use, have a real choice of supplier.

What we will do:

- Ensure that consumers' views form the basis of any development of competition.
- Respond to Ofwat and Government consultations on competition to influence consumer issues.
- Meet business customers three times a year to ensure we fully understand their perspective and can represent their priorities.
- Hold regular meetings with inset appointees (where one supplier is replaced by another for a specific geographical area) to discuss and influence consumer issues.

What this will deliver:

- Ensure that consumers are central to the development of competition and that competition is only allowed to develop where it benefits consumers and can meet their expectations.

Measure/Indicator of success	2009-10
Ofwat and Government conclusions on the development of competition reflect our input on behalf of consumers.	Consumer views feature in Ofwat and Government decisions on competition.
Competition only develops where the benefits for consumers outweigh the costs.	Safeguards in place at Ofwat to learn lessons & protect consumers.
Business consumers see progress towards a competition regime that will offer a choice of supplier.	Business consumers views confirm that progress is being made.

Sewer Flooding - sewer flooding prevention and adequate response from Water and Sewerage companies

Objectives

- Working with water and sewerage companies and stakeholders to deliver actions to help prevent flooding from sewers.
- Ensuring consumers affected by sewer flooding receive an appropriate response from companies and are adequately compensated.

What we will do:

- Use the findings of consumer research to inform our policies.
- Work with all relevant bodies and organisations to influence decisions on changes based on our policy.
- ‘Benchmark’ water and sewerage companies’ policies for responding to sewer flooding incidents and compensating consumers, and promote best practice across the industry.
- Where sewer flooding is caused by a service fault by a company compensation given to affected consumers is not paid for by other customers.
- Work with Ofwat in developing a new methodology for how water and sewerage companies’ record sewer flooding incidents based on the severity of the incident, the risk of it re-occurring, and the impact on the consumers affected and whether mitigation measures are appropriate to reduce the risk of flooding.
- Monitor how companies are maintaining and cleansing sewers to prevent blockages.
- Educate consumers on how they can help prevent blockages in sewers.
- Push for appropriate investment in the maintenance and upgrading of sewer networks to reduce the risk of flooding.
- Promote the ‘partnership’ approach to tackling the causes of flooding between all parties involved in drainage to help prevent flooding by better management of surface water.

What this will deliver

- Consumers will receive ‘best practice’ response to sewer flooding incidents and compensation regardless of which company provides the service.
- In cases of flooding incidents caused by service failures, compensation is not subsidised by other customers.
- Sewer flooding incidents are investigated and recorded consistently, and investment to reduce the risk of sewer flooding is prioritised proportionately and fairly.
- Reduction in the number of sewer flooding incidents caused by blockages in public sewers.
- The 2009 price reviews delivers adequate investment to make further progress in reducing the risk of sewer flooding from 2010 to 2015.
- More sustainable solutions to reducing sewer flooding are delivered through the improved management of surface water.

Measure/Indicator of success	2009-10
A reduction in the number of sewer flooding incidents.	Reduction by 2010 in the number of sewer flooding incidents.
Water and sewerage companies adopt agreed 'best practice' approach to sewer flooding incidents and compensation whilst taking into account of the impact of the incident on the consumer.	Company adoption of best practice and promotion of CCWater's sewer flooding 'leading edge' register.

5. OTHER ACTIVITIES AND MONITORING

While we will focus on our priority work areas, we will step in where there are areas of concern to water consumers, and intervene and speak up on their behalf.

Speaking up for Consumers

To inform consumers about aspects of the water industry we will:

- Use messages that consumers can relate to and easily understand.
- Be open and transparent.
- Use consumer and other research to shape our policy work.
- Work with stakeholders to promote evidence based messages.
- Ensure that CCWater is visible to those who need our services.

Measure/Indicator of success	2009-10
Media - Gain media coverage for each of the main CCWater campaign headings in the Forward Work Plan i.e. Water on Tap, Price Review/Speaking up for Water Consumers, Right First Time, Value for Money and Keep it Clean.	5% increase on 2008-09.
Web site - Maintain the upward trend of web site hits to the CCWater web site in 2008 by linking to key media campaigns, and further innovative content, consumer focused information and design	5% increase on 2008-09.

Support Services

We have put in place revised Service Level Agreements (SLAs) with Ofwat since 1 October 2007 to provide: Human Resource Management, Finance and Library and Information services. Having been out to formal tender for these services we believe that we continue to receive better value for money for those services than via alternative suppliers in the market.

Since September 2006 computer services have been provided by Northgate Information Solutions. The CCWater Web and Intranet sites are hosted and supported by BOX UK. Our consumer contact database is hosted and supported by the software designers Right Now technologies.

CCWater has access to its own independent legal advisors as required.

Measure/Indicator of success	2009-10
Network Availability.	99% availability.
Internal & External Auditing.	100% Satisfactory Audit Results.
Prompt of payment of Invoices.	90% within 20 working days.
Prompt offers of employment letters following final interview.	99% within 10 working days.
Value for Money - Procurement Savings.	£50k savings
Health and Safety Compliance - No RIDDOR reportable incidents.	100%
Staff Training - Annual Updates on Health & Safety, Diversity and Security.	95% attendance
Internal Communications - Maintain staff confidence in improvements to internal communications - 69.4% from the 2008 staff survey.	Maintain levels

Summary

Operational Business Plan Key Targets for priority areas of work

Measure	2009-10												
2009 Price Review													
Companies continue to use consumers' views to shape their final business plans and the business plans are supported by Government and regulators.	Monitor companies.												
Value for Money													
Consumer views and research evidence are built in to the Westminster Government Water Strategy Review of fair charging and metering, and the Welsh Assembly Government Strategic Policy Position Statement on Water.	Government accepts that mechanisms must be in place to protect those who are vulnerable and least able to pay.												
Volume of special assistance customers on the companies' registers, and a better balance between customers seeking Special Assistance in the water industry and those in gas and electricity.	Improvement in the figures returned to Ofwat in June Return.												
Volume of consumers' satisfied with the value for money from the water and sewerage services in their area.	Results from Tracking Survey.												
Business customers' views are heard within the Independent Government review of competition.	Progressive measures are included in the Floods and Water Bill should it go ahead.												
Right First Time													
One percentage point year on year increase on consumer satisfaction with CCWater's complaint outcome, speed and quality of service. Courtesy is a new measure.	<table> <tr> <td>Outcome</td> <td>61%</td> <td>(58%)</td> </tr> <tr> <td>Speed</td> <td>76%</td> <td>(73%)</td> </tr> <tr> <td>Quality</td> <td>64%</td> <td>(61%)</td> </tr> <tr> <td>Courtesy</td> <td>82%</td> <td></td> </tr> </table> (from base 2006/07)	Outcome	61%	(58%)	Speed	76%	(73%)	Quality	64%	(61%)	Courtesy	82%	
Outcome	61%	(58%)											
Speed	76%	(73%)											
Quality	64%	(61%)											
Courtesy	82%												
One percentage point year on year increase on number of complaints to CCWater resolved within our 20 day and 40 day targets	<table> <tr> <td>5 day response</td> <td>99%</td> <td>(98%)</td> </tr> <tr> <td>20 day close</td> <td>75%</td> <td>(73%)</td> </tr> <tr> <td>40 day close</td> <td>89%</td> <td>(87%)</td> </tr> </table> (from base 2007/08)	5 day response	99%	(98%)	20 day close	75%	(73%)	40 day close	89%	(87%)			
5 day response	99%	(98%)											
20 day close	75%	(73%)											
40 day close	89%	(87%)											
Consumers satisfaction with companies handling of complaints and enquiries	Measurable Improvement												
Water on Tap													
Percentage of consumers who agree that "everyone needs to do what they can to reduce the waste of water".	Year on year increase in the tracking survey results.												
Percentage of consumers who are satisfied with the taste and the smell, colour and appearance, safety and reliability of supply of their tap water.	Year on year increase in the tracking survey results.												

Engage in two further consumer communication initiatives for tap water within the Water for Health stakeholder Alliance.	Monitor via Business Plan.
Competition	
Ofwat and Government conclusions on the development of competition reflect our input on behalf of consumers.	Consumer views feature in Ofwat and Government decisions on competition.
Competition only develops where the benefits for consumers outweigh the costs.	Safeguards in place at Ofwat to learn lessons & protect consumers.
Business consumers see progress towards a competition regime that will offer a choice of supplier.	Business consumers views confirm that progress is being made.
Sewer Flooding	
A reduction in the number of sewer flooding incidents.	Reduction by 2010 in the number of sewer flooding incidents.
Water and sewerage companies adopt agreed 'best practice' approach to sewer flooding incidents and compensation whilst taking into account of the impact of the incident on the consumer.	Company adoption of best practice and promotion of CCWater's sewer flooding 'leading edge' register.

In addition, other key targets will be:

Communications	
Media - Gain media coverage for each of the main CCWater campaign headings in the Forward Work Plan i.e. Water on Tap, Price Review/Speaking up for Water Consumers, Right First Time, Value for Money and Keep it Clean.	5% increase on 2008-09.
Web site - Maintain the upward trend of web site hits to the CCWater web site in 2008 by linking to key media campaigns, and further innovative content, consumer focused information and design.	5% increase on 2008-09.
Support Services	
Network Availability.	99% availability.
Internal & External Auditing.	Satisfactory Audits.
Prompt of payment of Invoices.	90% within 20 working days.
Prompt offers of employment letters following final interview.	99% within 10 working days.
Value for Money - Procurement Savings.	£50k savings.
Health and Safety Compliance - No RIDDOR reportable incidents.	100%.
Staff Training - Annual Updates on Health & Safety, Diversity and Security.	95% attendance.
Internal Communications - Maintain staff confidence in improvements to internal communications - 69.4% from the 2008 staff survey.	Maintain levels.

6. TRACKING PROGRESS

In order to measure progress of the industry and CCWater's influence we will continue to do tracking surveys.

Tracking survey of consumers' views

- Obtain consumers' perceptions and expectations on all aspects of their water and sewerage services
- Obtain views from different consumer groups to identify their specific needs, and to understand how companies can tailor their services to meet those needs
- Obtain consumers' perceptions and expectations about the role and work of CCWater.

Survey of organisations to assess CCWater's influence on their actions or decisions that have improved things for consumers

- Undertake survey of our stakeholders to gain feedback on their perception of CCWater's influence in getting the best deal for water consumers.

We will also monitor the progress of delivering what we said we will do in a work progress report regularly updated by the owners of the work.

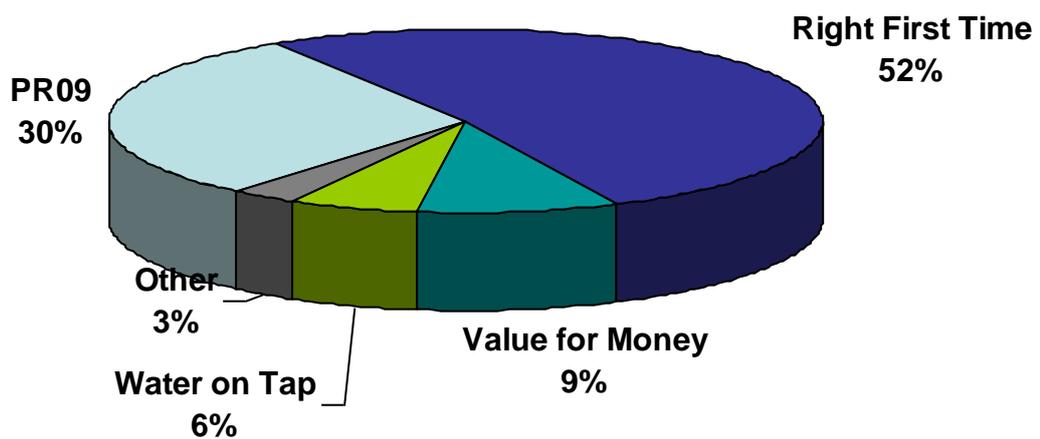

7. RESOURCES

We will continue to monitor CCWater's performance ensuring that we deliver value for money and are well placed to deliver effective consumer representation.

For 2009-10 CCWater has a budget of £6.454m and staff of 78 (full time equivalents) working from offices in Birmingham, Bristol, Cambridge, Cardiff, Darlington, Exeter, London and Manchester.

We also have 56 Committee members, 1 Chair, 5 Regional Chairs and 4 Independent board members. Our organisation structure is set out at Annex C.

CCWater's resources will be allocated as follows:

8. Governance

Organisational structure

CCWater will continue to develop and deliver policies across England and Wales using our existing office network.

Governance

The key parts of the organisation's governance framework consist of:

- The Board, with the Chair of the organisation, the Chief Executive, four English regional members, a member for Wales and four independent members. The Board meets ten times during the year, with some of the meetings being open to the public
- Three Board committees, with remits for: Audit and Risk Management, Finance and Resources, and Remuneration.

The National Audit Office undertakes the external audit function and internal audit services are provided by an external commercial organisation.

APPENDIX A

Legal functions, duties and powers of CCWater

CCWater has duties to represent the interests of customers of licensed water suppliers in the new competition regime that came into operation on 1 December 2005, as well as the interests of customers of water and sewerage companies.

CCWater has the following functions, duties and powers under the Water Industry Act 1991 (as amended by the Water Act 2003):

- **S27A (12) Establishment of the Council and Committee** - requires CCWater to exercise and perform its powers and duties in the manner which it considers is best calculated to contribute to the achievement of sustainable development.
- **S27B Co-operation between Council and other authorities** - requires CCWater to agree a memorandum of understanding with the Authority (Ofwat), the Secretary of State (Defra and DWI) and the Welsh Assembly Government.
- **S27C The interests of consumers** - requires CCWater to have regard to the interests of :
 - a) individuals who are disabled or chronically sick;
 - b) individuals of pensionable age;
 - c) individuals with low incomes;
 - d) Individuals residing in rural areas: and
 - e) Consumers who are ineligible to change their water supplier.
- **S27D Acquisition and review of information** - provides for CCWater to obtain and keep under review information about consumer matters and the views of consumers.
- **S27E Provision of advice and information to public authorities** - provides for CCWater to make proposals, provide advice and information about consumer matters and represent the views of consumers to public authorities, undertakers, licensed water suppliers and other persons whose activities may affect consumers.
- **S27F Provision of information to consumers** - provides for CCWater to provide information to consumers about consumer matters.
- **S27G Power to publish information and advice about consumer matters** - (subject to certain conditions) gives CCWater the power to publish advice or information about consumers' matters or consumers' views where it would promote the interests of consumers.
- **S27H Provision of information to the Council** - (subject to certain conditions) provides for CCWater to request information from the Authority, undertakers or licensed water suppliers.
- **S27J Provision of information by the Council** - provides for CCWater to provide information to the Authority, Secretary of State or the Welsh Assembly Government.
- **S29 Consumer complaints** - provides for CCWater to deal with complaints about the services provided by an undertaker or licensed water supplier.
- **S29A Power of Council to investigate other matters** - gives CCWater the power to investigate any matter which appears to it to be a matter relating to the interests of consumers.
- **S38B Publication of statistical information about complaints: (water)** - requires CCWater to publish statistical information relating to complaints received by undertakers, licensed water suppliers and regulators about water services.
- **S95B Publication of statistical information about complaints (sewerage)** - requires CCWater to publish statistical information relating to complaints received by undertakers and regulators about sewerage services.

APPENDIX B

Risk Management

The organisation has a risk management strategy and an established risk register which is reviewed on a regular basis by the Executive team, the Audit and Risk Management Committee and ultimately the Board.

From the current version of the risk register the key risks have been identified as shown below. An initial assessment is made of the likelihood of each risk occurring when it is placed on the register, together with an assessment of the impact of that risk on the organisation. The likelihood of occurrence is regularly monitored.

Risk	Key controls in place within the organisation to mitigate the risk
The organisation fails to deliver its forward work programme.	<ul style="list-style-type: none"> • Forward Programme restricted to key initiatives on consumers' priorities where CCWater can make a difference forms basis of objectives for all CCWater staff and Committee. • Policy managers assigned to drive Forward Programme projects. Key stakeholders identified to check we are not duplicating others' work. • Regular reporting of performance to the executive team and Board. • Regular review of priorities. • The executive team regularly consider strategic issues at meetings with clear decisions made.
The organisation fails to convince customers of its validity as an organisation capable of representing consumers and being effective.	<ul style="list-style-type: none"> • Key messages are clearly expressed to key stakeholders. • Annual report and other regular reports focussing on achievements of delivering Forward Work Programme, targets and benefits.
BERR reorganisation of consumer representation distracts CCWater's delivery of FWP.	<ul style="list-style-type: none"> • Focus on Forward Programme / Business Plan delivery. • CCWater has specific individual staff involved - no others distracted from delivery of FWP.
Job Insecurity with a consequent loss of key staff as a result of BERR review.	<ul style="list-style-type: none"> • Continuity plan for loss of key staff - key individuals and other staff categories including case officers. • Keep staff fully informed of progress.
The organisation is portrayed as offering inappropriate advice / inadequate customer service and / or different service levels in some regions.	<ul style="list-style-type: none"> • Monitoring customer satisfaction. • Consumer satisfaction with complaint and enquiry responses. • Develop service proposition / model office. • Review process of following complaints about CCWater. • Potential to review cases centrally using the new Consumer Contact system if required.
The organisation does not clearly demonstrate value for money with its budget.	<ul style="list-style-type: none"> • Review of organisation driven by benchmark comparisons. Opportunities identified to refocus resource or reduce costs. • Identify costs of initiatives / priorities more clearly. • Review benchmarking and new benchmarks.
